

MANUAL FOR FINAL SUBMISSION

- Due to incompatibility with 'Google chrome', please open my project in 'Mozilla Firefox'. By opening in Firefox only, it will not give the error due to the CROS policy. It is a chrome error.
- There is a html file called 'final.html'.
- On opening it, two buttons can be seen with labelled 'Physical Map', 'Political Map', 'Moon' and 'Earth and Moon'. Clicking on the button will open respective celestial body.
- The political and physical maps of earth are same as the submission of last week.
- I have added two new links to moon and of earth and moon together.
- By clicking on the respective buttons, moon can be seen and next the earth and moon can be seen together.
- Moreover, the cursor should be moved on the screen, from right/left or up/down or vice versa to view the objects from different angles.
- Please go back in browser to return to the main page.
