

MANUAL FOR WEEK 1

- Week1.html contains the '2D elevations' for a house.
- It can be seen that there are three views- front, side and top.
- Below this, again all the three views are drawn but transformations have been applied on it.
- 4 transformations that are translate, rotate, scale and shear have been implemented.
- In front of these options, there is a bar which can be slide to change the values of respective options.
- Also, alongside the bar there are boxes which display the value of the current position.
- Minimum and maximum have been set for all the options.
