WEEK 1 REPORT

I accomplished the following tasks in the week 1:

1. We were required to design front, top and side view of any generic objects in 2D. For that I choose 'Dream House' which was given as an example by the professor.
2. I implemented it using SVG as it is very easier to create vector objects using that.
3. Also, I implemented some functions like transform, scale, rotate and shear on the all the views.
4. This will help in the future part of the assignment to implement 3D objects and transformations on them.
